

15 September 1958

JAMMING OF RADIOBROADCASTS FROM WESTERN EUROPE TO POLAND

A West German newspaper reports that radiobroadcasts from Western Europe to Poland are being jammed from stations located in East Germany, Czechoslovakia, the USSR, and USSR military posts within Poland. 1/

COMMENT: Since the discontinuance of jamming in Poland in November 1956, there have been isolated reports of jamming of radiobroadcasts from Western Europe to Poland. In recent months, however, an increasing number of reports have indicated a step-up in the number of radiobroadcasts from Western Europe that have been jammed. 2/ The locations of these jamming stations are believed to be outside Poland. In this connection, it is doubtful that USSR military units stationed in Poland are engaged in jamming activities.
